# HAT SIZING

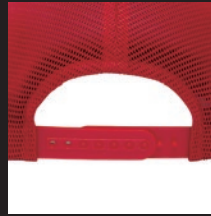

# HAT COMPONENTS

## VISOR

A fabric-covered round piece attached to the front of the cap.

Made to help shield the eyes from the sun, visors come in a wide range of shapes and curvatures to cater to a variety of headwear styles.

## CLOSURE

The back piece of the cap that determines fit and adjustability.

There is a wide range of closure types such as snapbacks, buckles, and plastic hooks made to give our customers the perfect fit.

## CROWN

The distance from the bottom edge of the cap to the top of the head.

This helps determine the depth of the cap. A smaller number means the cap will sit higher on the head while a larger number means the cap will sit lower.

## PROFILE

The slope of the cap's crown.

Low-profile caps tend to have crowns that are more angled while high profile caps have crowns that are more perpendicular to the visor.

## PANELS

Triangular pieces of fabric that are stitched together.

These pieces come together to form the main rounded structure of the cap. Depending on the style, caps generally consists of 5 or 6 panels.
